

Why Mobile Phones And Cellular Solutions Are So Beneficial To Your Business .

A business mobile airtime contract and company mobile phones are one of the most important investments you should be making for your business. The world of technology is developing at a rapid rate and in order to remain a thriving business, it is vital to take advantage of the many different benefits that these new technological breakthroughs can offer companies.

Business phones offer remote working opportunities

If your business is already introducing remote working, or is thinking about it at all, then a business mobile contract is essential to equip your employees. We can also help keep your business and it's data safe.

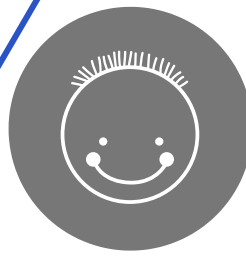

- 70% of employees globally work remotely at least once a week.
- half of the UK workforce will be working remotely by 2020.
- nearly half of businesses surveyed said Bring Your Own Device (BYOD) initiatives had increased security risks.
- 95 percent of UK businesses are still struggling with remote working and security.

Home workers rated their productivity at 7.7 out of 10

30% said that telecommuting allowed them to accomplish more in less time

Those who work remotely at least once per month are 24% more likely to be happy and productive in their roles

Employee retention rates increase by 10 percent in organisations that embrace remote working
